It has a very big community of users who regularly add new features and translate new languages. You can download and install it absolutely free of charge from here: `""""` ACCURRIP works by analyzing all the information in a Windows file to make sure that it is truly what the user wants (a translation of the file). It can also take icons, add watermarks to images (which means that your file can be protected by one of those special watermark protection keys, such as `"""`1137-4575`"""`, which will be added automatically to your file by ACCURRIP when you are saving it). Download and install AccuRIP, and you will see your own integrated translation/translation dictionary and your own icon; you can save the file in any folder you like. Please note that there is no `"""`single`"""` accuRip, as in all the other softwares. ACCURRIP is composed of many plugins which are integrated to one another: `""`Grammar Image-Visualizer`""` `""`Translation/Translation Dictionary`""` `""`Watermark`""` `""`String`""` `""`Plain-Text`""` `""`Converter`""` `""`Distiller`""` Each can be used individually or in conjunction with other plugins. `""`Examples of use`""` If you need to extract a file only for translation purposes and you do not need the icon of the file itself, you can use either the Converter or the Distiller, with the desired output format (plain text, XML
