The PROMARS plug-in engine provides numerous signal processing effects. Some of the most sought-after processing effects include the versatile Rotary Comp, a hybrid stereo rotary filter, and a multiband EQ. Effects plugins provide a key component of a synth's sonic character, and many processing effects plugins are tailored to be used in conjunction with bass or lead sounds.

PROMARS plug-in also includes a comprehensive set of modern analog instrument voices, including five original Roland analog instrument voice modes, 15 classic and contemporary analog synthesizer patches, and four classic synthesizer patches from the studio-class powerhouse, the GR-100. Features Classic Roland Synth Models Classic PROMARS analog modeling instruments include the TU-3, the PAF-80, the CL-55, the GR-900, the TB-3, the TB-03, the VG-8, the VL-5, the DX-7, the TR-808, the TR-606, and the TB-303.
